1.0 Celebrate Menu Item

1.0.1 Celebrate Window

Purpose

Show employees the current posts to amplify and who is leading, so sharing feels recognized and easy.

Who uses it

Everyone. People with no Amplify role see only this menu. This is the only window for 99% of our employees. (Except for Novera notifications.)

What it does

1. Shows a carousel of current official posts. The Amplify button on each card opens the post to share it.
2. Shows the top three amplifiers this week on a podium.
3. Shows "My Position This Week" with your rank, your points and how far you are from the top 3.
4. Shows the team leaderboard for your team.
5. Names are never clickable for employees without an Amplify role, those that do can click on names throughout the system and see details. See the 3.0 Dashboards section for more information about this feature.
6. Associate their LinkedIn account with their WSO2 account using the Link Me pop-up.

POSTS TO AMPLIFY

1–3 of 14

WSO2 Integrator 5.0 is here

WSO2 on LinkedIn · Oct 18, 2026

Priority Product

AI-native integration, one platform. Share it with your network.

AMPLIFY

Novera mock test: WSO2 named a Leader

WSO2 on LinkedIn · Oct 22, 2026

Product

Analysts again place WSO2 among the leaders. Read why, then share it with your network so more people see it.

AMPLIFY

E2E campaign 1792703575

WSO2 on LinkedIn · Oct 22, 2026

Product

Local e2e smoke test

AMPLIFY

TOP THREE AMPLIFIERS THIS WEEK

MY POSITION THIS WEEK

Rank	Points	
#4	16	2 pts to the top 3.

TEAM LEADERBOARD · FORWARD DEPLOYED ENGINEERING

#	Team member	Points
1	Avery Demo	25 pts
2	Blake Demo	18 pts
3	Adam Admin	17 pts
4	**Scott Demo** You	**16 pts**
5	Casey Demo	12 pts
6	Devon Demo	8 pts
7	Emery Demo	4 pts

Each new week users will see this until someone amplifies a campaign.

Each campaign title can be clicked to show the full company posting on LinkedIn.

1.0.2 Link Your LinkedIn Account pop-up

Purpose

Associate the user's LinkedIn ID with their WSO2 id.

Who uses it

Everyone that is going to do an Amplify action on LinkedIn through WSO2 Amplify.

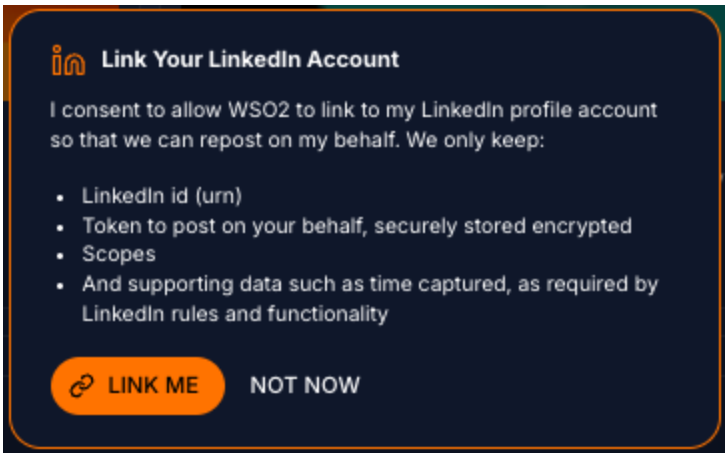

What it does

1. Uses the LinkedIn API for connecting accounts using OpenID
2. Stores the retrieved token[1] for use again later.
3. Then the user continues on to 1.0.3 Amplify this post pop-up

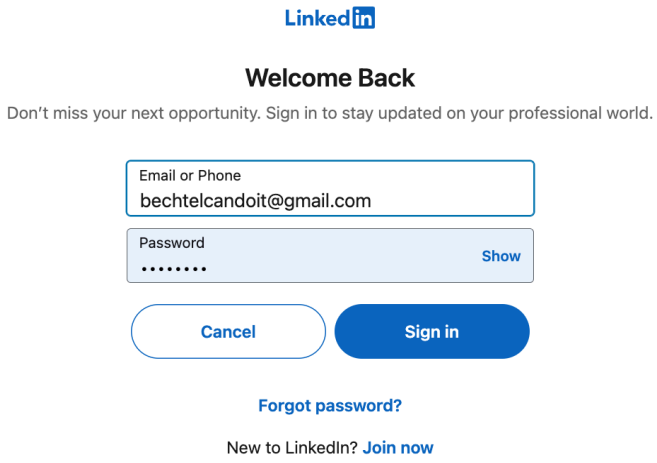

Link Me

If the users clicks amplify and they don’t have an active LinkedIn token in our system then they go through the connection pop-up workflow.

First click link me.

Then sign into LinkedIn.

1.0.3 Amplify this post pop-up

Purpose

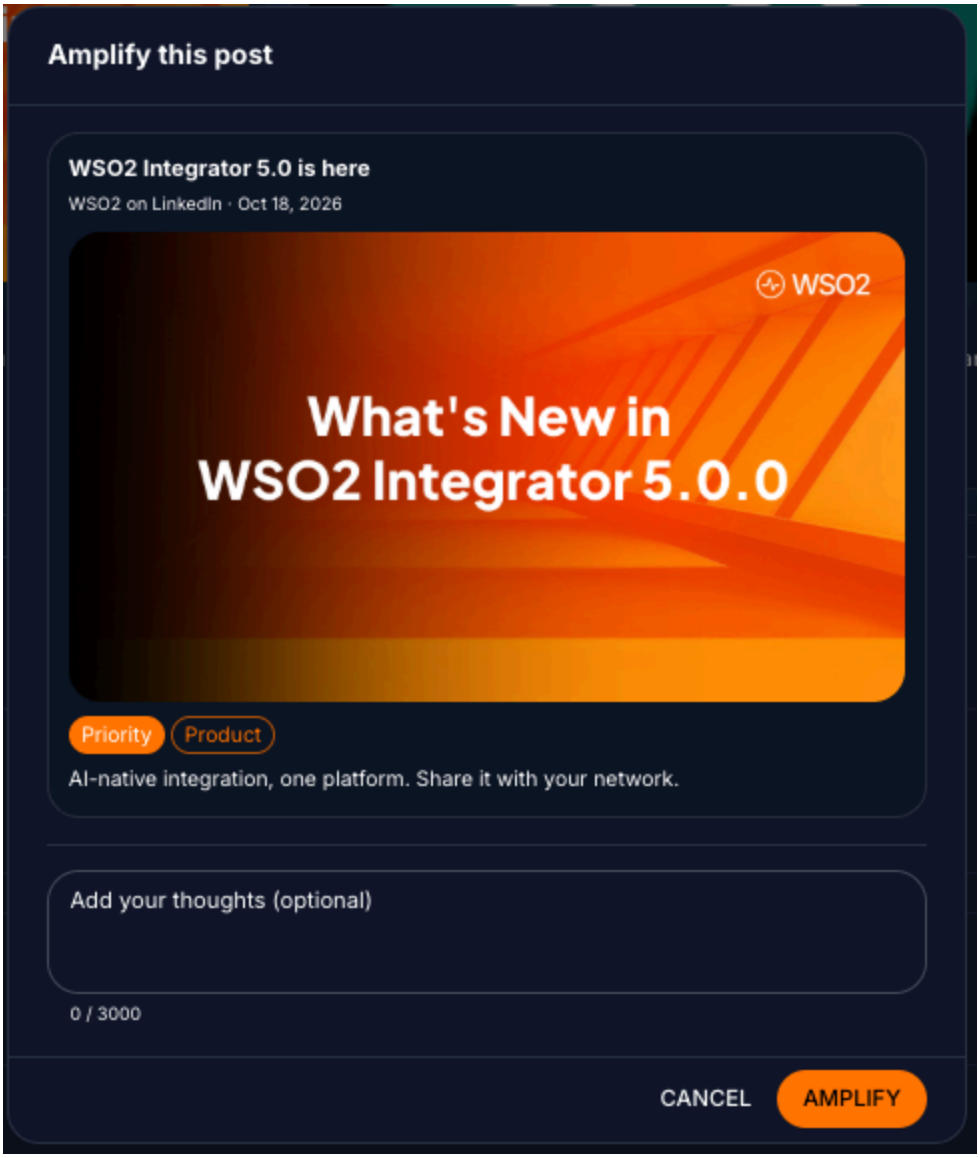

Allows the user to either “Amplify” as a LinkedIn Repost if the “Add your thoughts (optional)” box stays empty. Or Repost with Comments if they fill in their thoughts in that box.

Who uses it

Everyone that is going to do an Amplify action on LinkedIn through WSO2 Amplify.

What it does

1. Tells the Amplify backend system to connect to LInkedIn on behalf of the user and do the repost.
2. The backend decrypts their stored id, uses the API and the post shows up on their feed.
3. We audit every amplify button click to keep a record of who requested what actions as required by LinkedIn.

[1] Token Encryption

The LinkedIn member tokens Amplify stores. These are the ones that are encrypted.

- Algorithm: AES-256-GCM, with a 32-byte key, a 12-byte random nonce per encryption and a 128-bit tag.
- Row binding: The row is bound as AAD, and each row carries a key_id.
- Key storage: The master key lives in Choreo secrets (TOKENKEYS), and key rotation re-encrypts old rows.
- Code: amplify-common/modules/crypto/token_cipher.bal.
- Implementation: It runs through the JDK javax.crypto via Ballerina interop.
- Layering: Aiven's default at-rest encryption sits underneath it.

2.0 New Post Menu Item

2.0.1 New Post Window

Purpose

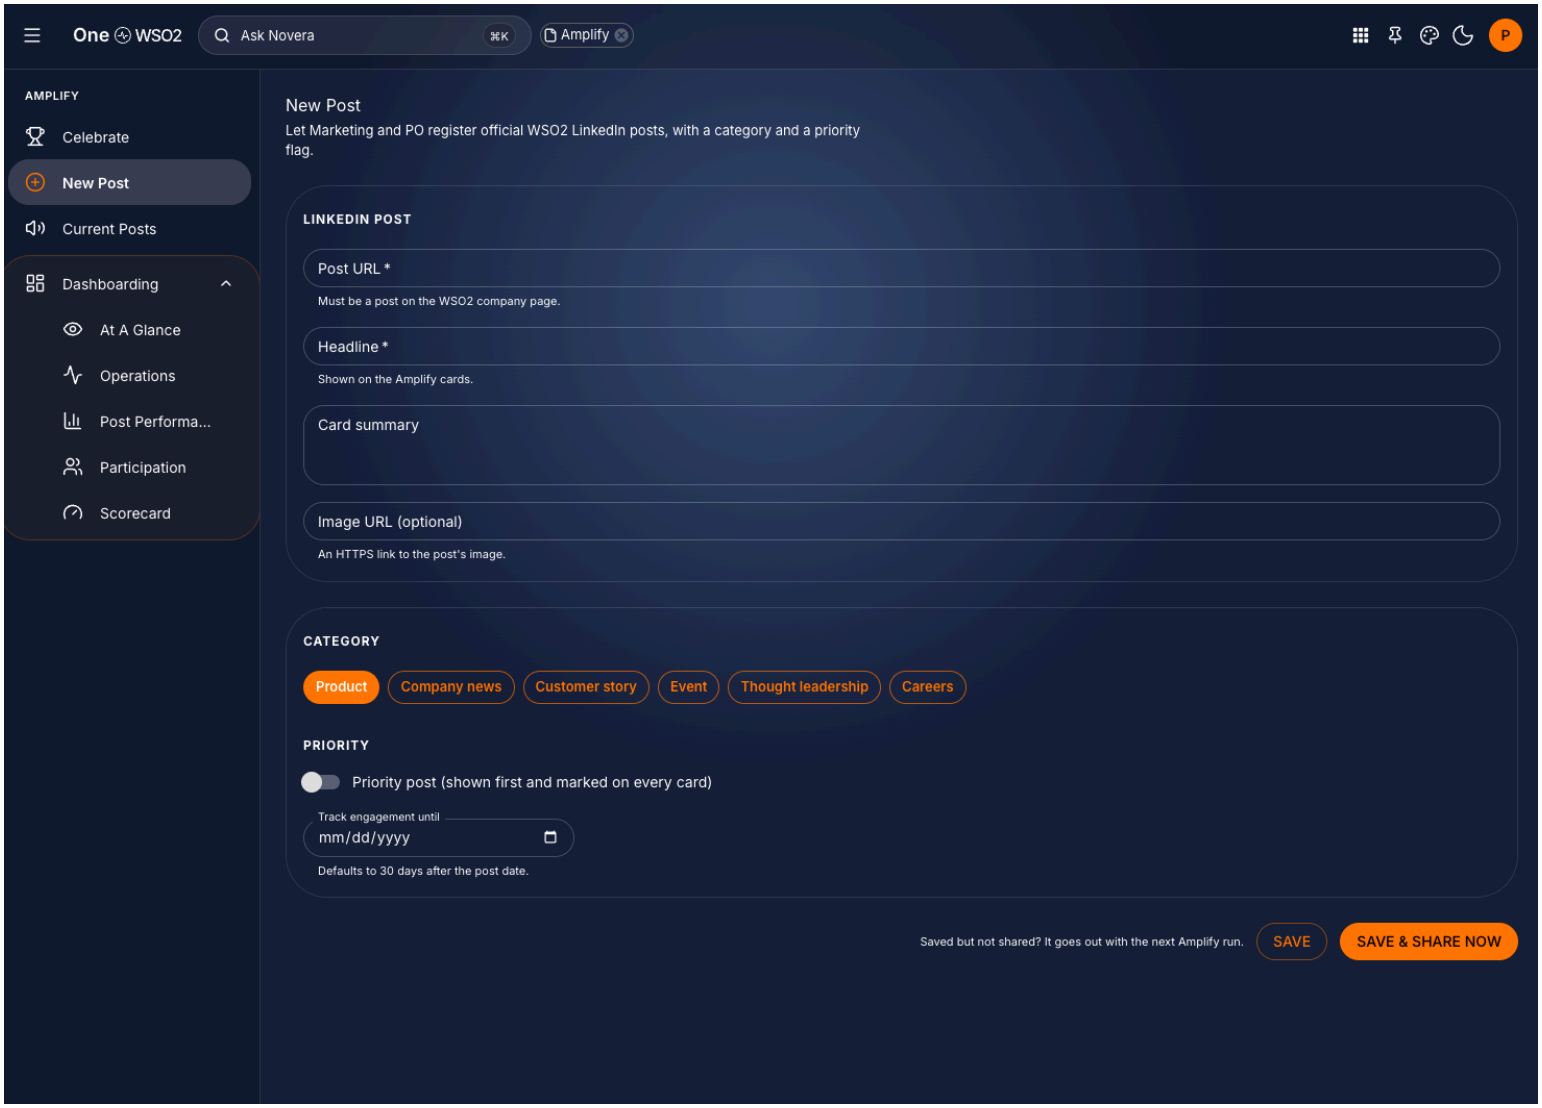

Register an official WSO2 LinkedIn post so it appears in Amplify and goes out to the Chat space.

Who uses it

Marketing and PO.

What it does

1. Takes the post URL (it must be on the WSO2 company page), a headline, an optional card summary and an optional image URL. Use CDN-published image URLs.
2. Takes one category: Product, Company news, Customer story, Event, Thought leadership or Careers.
3. Has a Priority switch. Priority posts show first and are marked on every card.
4. Has a "Track engagement until" date. It defaults to 30 days after the post date.
5. Save & Share Now saves the post and sends it to the Google Chat space. Save holds it, and it goes out with the next Amplify run.

Hint

For image urls please use CDN published urls.

2.1 Current Posts Menu Item

2.1.1 Current Posts Window

Purpose

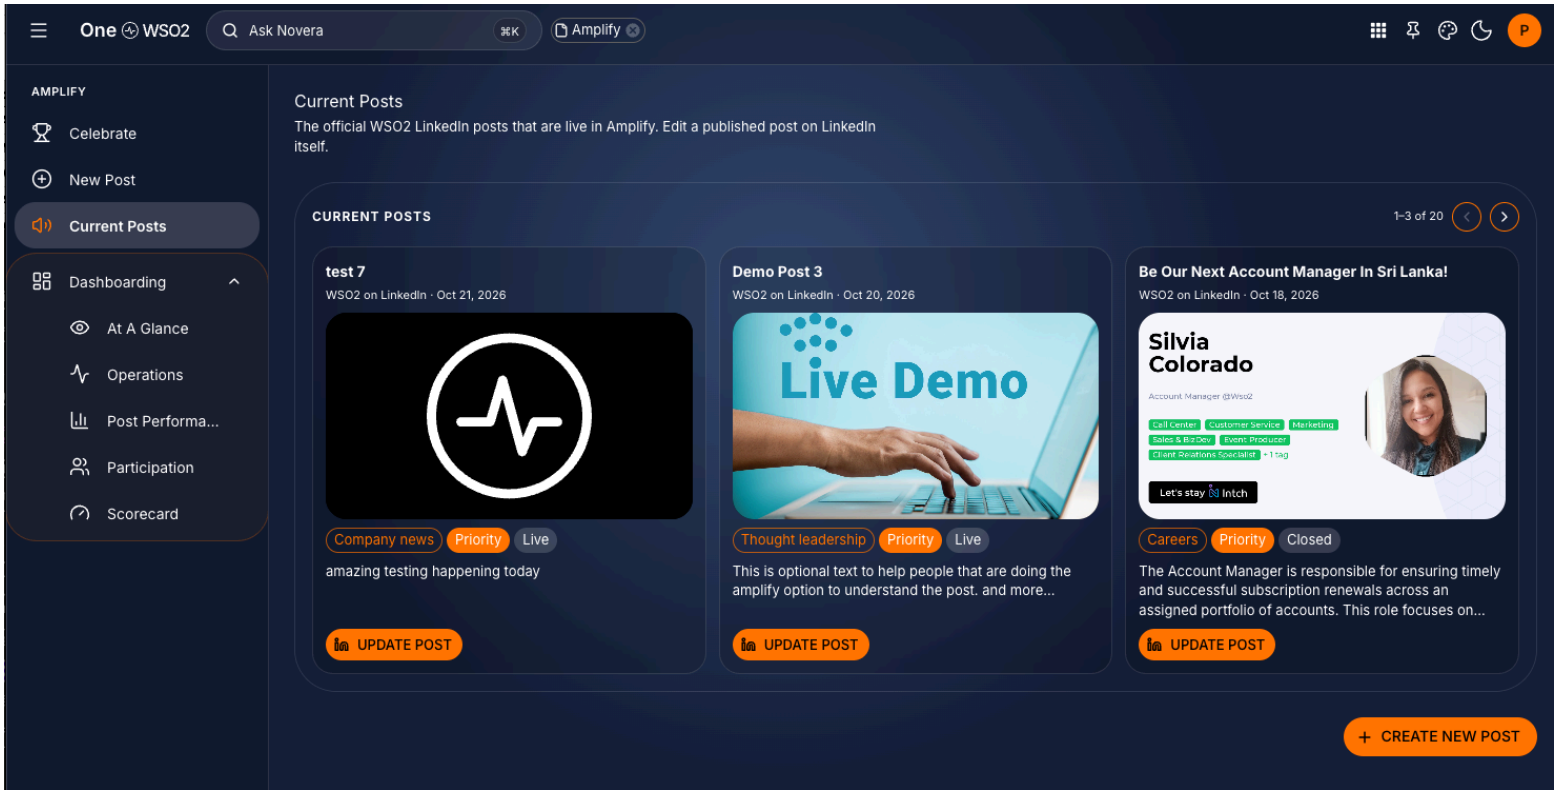

Show the official posts that are live in Amplify, and let the owners correct how they appear.

Who uses it

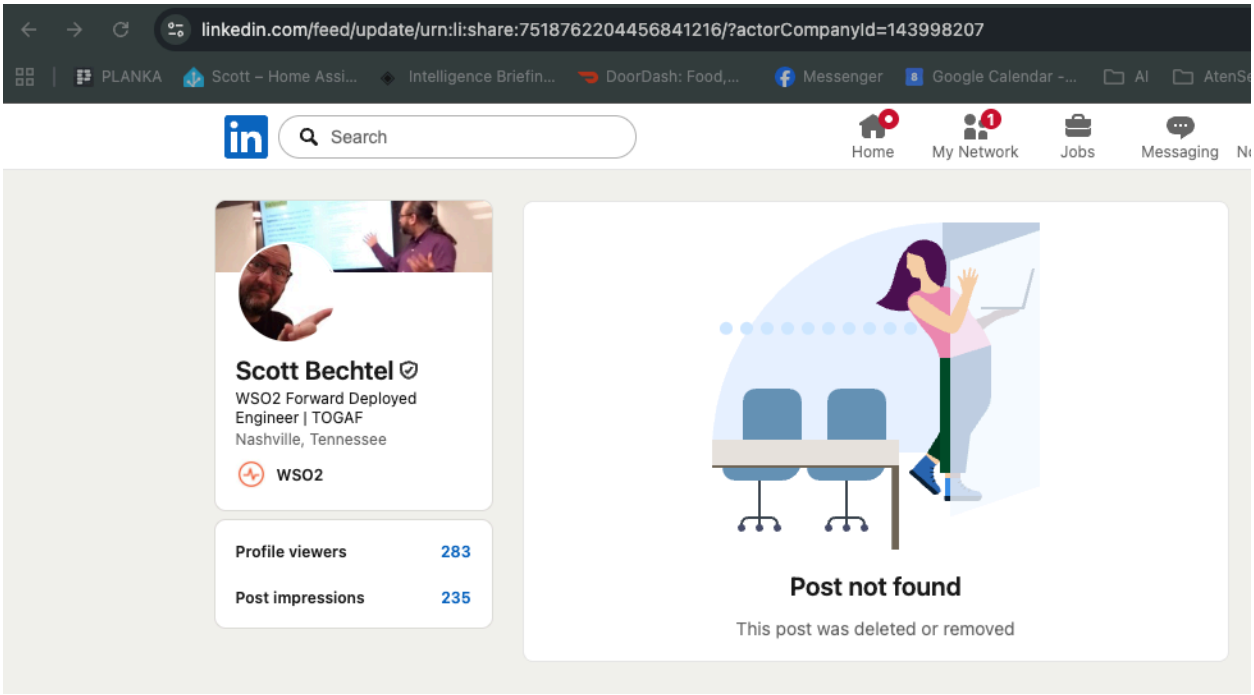

Marketing and PO.

What it does

1. Shows the live posts as cards, with category, Priority and Live or Closed tags. A Create New Post button sits at the bottom.
2. Clicking a post title opens the LinkedIn post.
3. Update Post opens the popup below.
4. Edits to the post on the LinkedIn platform are NOT reflected back here.

Click post title and you are taken to linkedin post

(Post not found since I cleaned up my linkedin account...)

2.1.2 Update Post Popup

Purpose

Correct the Amplify card details for a post after it has been registered.

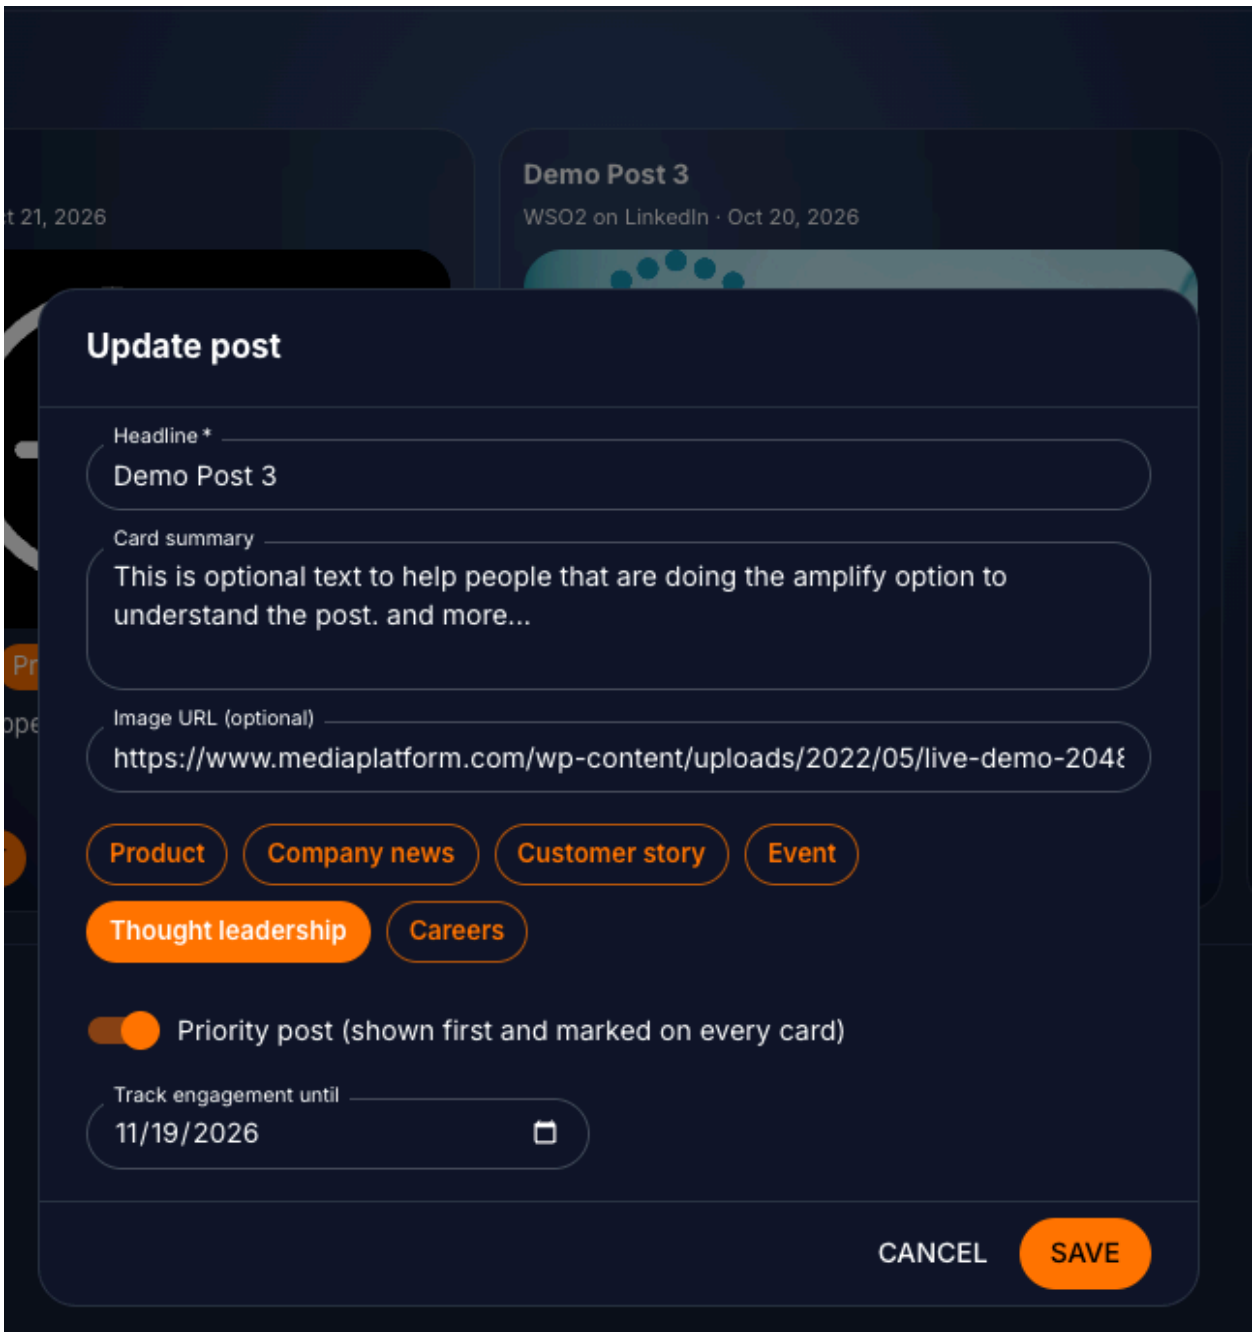

Who uses it

Marketing and PO.

What it does

Edits the headline, card summary, image URL, category, priority and the "Track engagement until" date. It has Save and Cancel buttons. It does not change the LinkedIn post.

Click on the **Update Post** button on the **Current Posts** window and then you can edit the details of the campaign in the **Update Post** pop-up.

3.0 Dashboarding Menu Item

This is a holder menu with a drop list icon which then displays the other menu items.

3.1 At A Glance Menu Item

3.1.1 At A Glance Window

Purpose

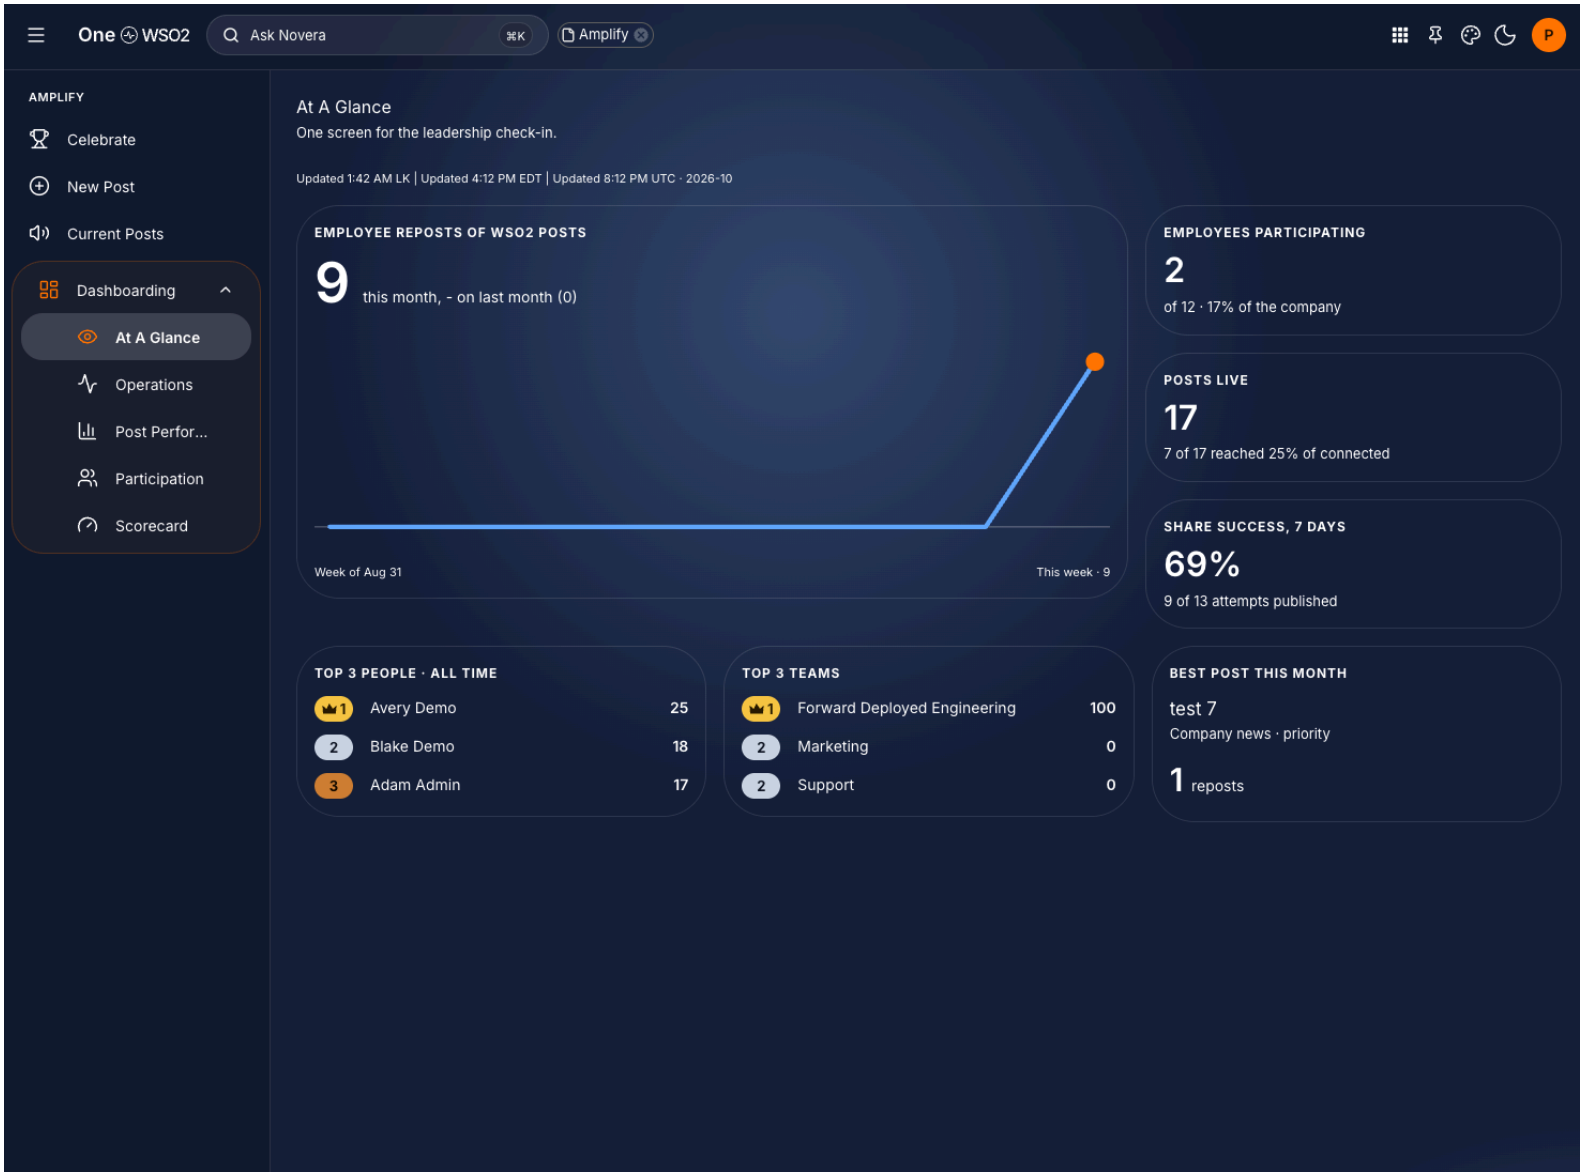

One screen for the leadership check-in.

Who uses it

SLT, PO and Marketing. Admin for troubleshooting.

What it does

Shows employee reposts this month against last month. Also shows employees participating, posting live and sharing success over 7 days. Lists the top 3 people, the top 3 teams and the best post this month.

3.2 Operations Menu Item

3.2.1 Operations Window

Purpose

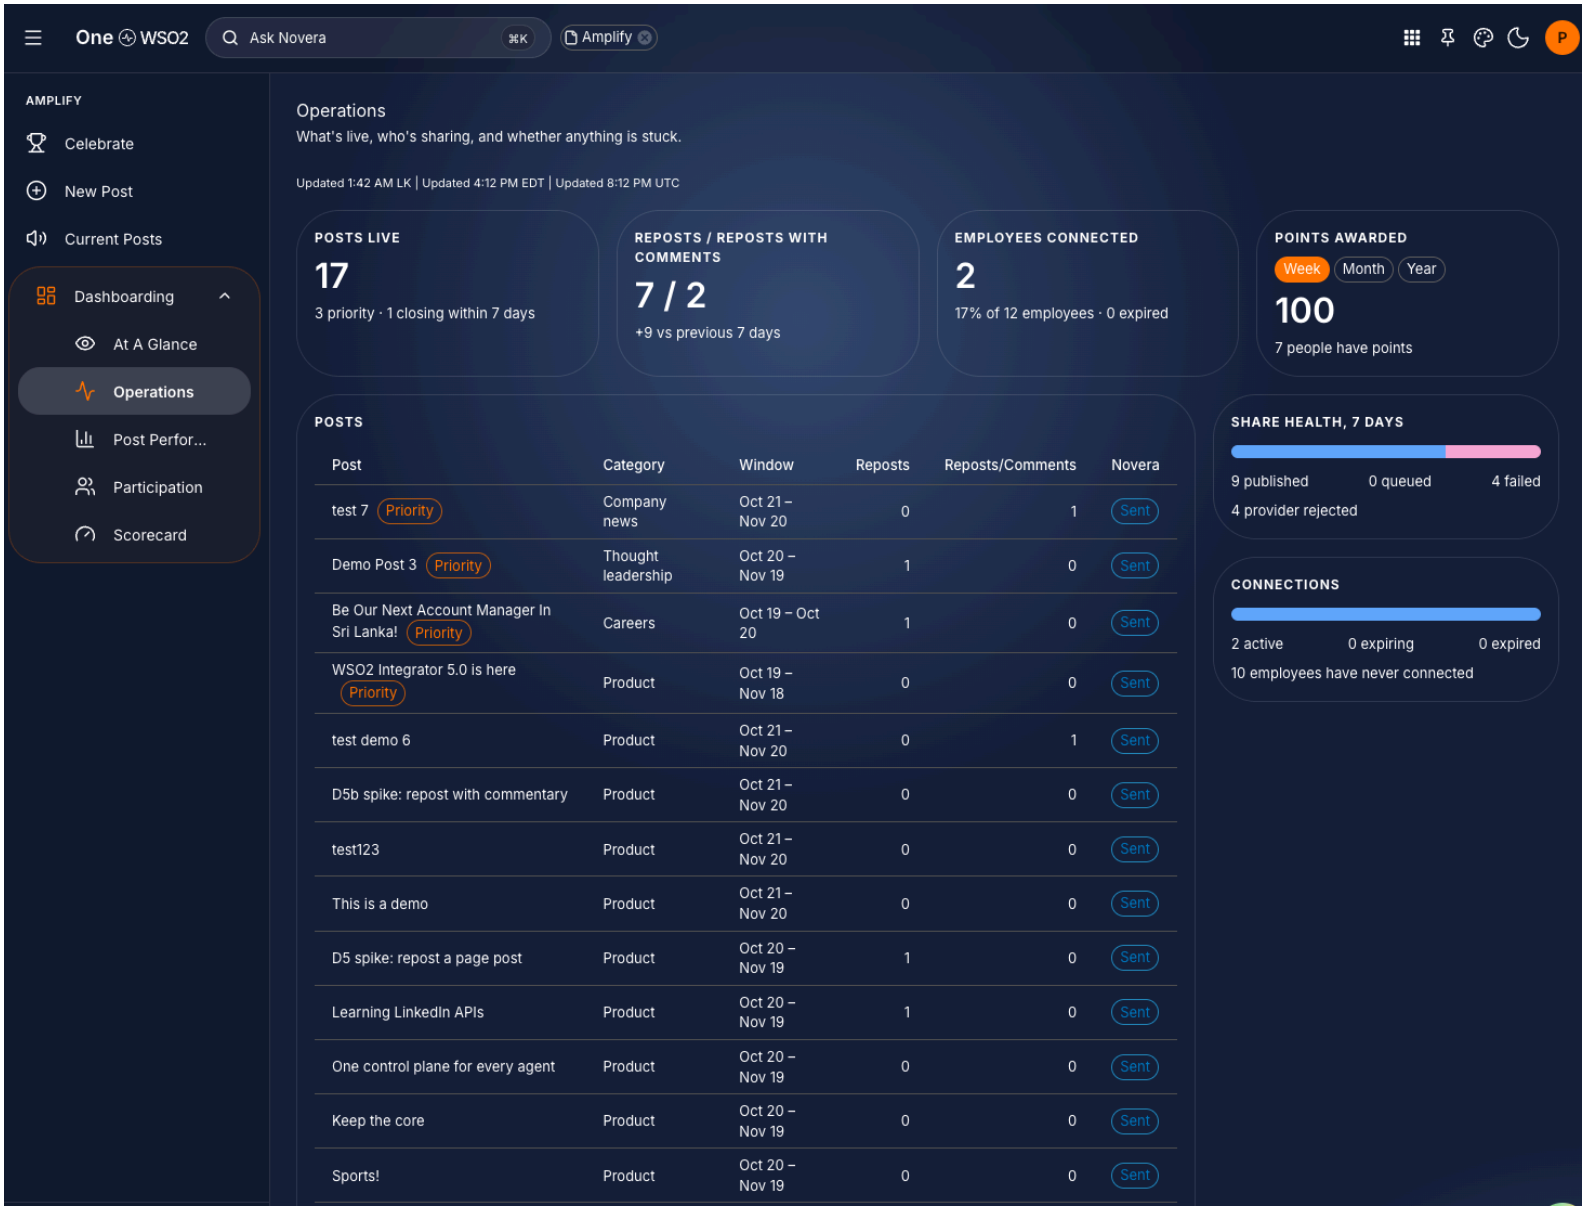

Show what's live, who's sharing and whether anything is

Who uses it

SLT, PO and Marketing. Admin for troubleshooting.

What it does

1. Shows tiles for posts live, reposts and reposts with comments, employees connected, and points awarded for the week, month or year.
2. Lists each post with category, tracking window, reposts, repost with commends, and Novera send status..
3. Shows share health for 7 days (published, queued, failed, rejected) and connection health (active, expiring, expired, never connected).

3.4 Participation Menu Item

3.4.1 Participation Window

Purpose

Show where employees drop out between hearing about Amply, and which teams lead.

Who uses it

SLT, PO and Marketing. Admin for troubleshooting.

What it does

1. Shows the employee journey: employees, connected to LinkedIn, reposted at least once, active in the last 30 days.
2. Shows a team leaderboard with points, participants, headcount ae.
3. Exports a CSV by day, week, month or year, with a date range. Each row has a record type (campaign, share request, connection, engagement, points).
4. Clicking a person's name opens the Person Engagement popup for le. It shows team, BU, reposts, reposts with comments, posts reposted, reposts per post and reposts by category.

Participation

Where employees drop out between hearing of Amplify and reposting regularly, and which teams lead.

Updated 6:21 AM LK | Updated 8:51 PM EDT | Updated 12:51 AM UTC

EMPLOYEE JOURNEY

Employees	12
Connected LinkedIn	2 · 17%
Reposted at least once	2 · 100% of connected
Active in last 30 days	2 · 100% of connected

0 connections have expired. 10 employees have never connected.

TEAM LEADERBOARD

3.5 Scorecard Menu Item

3.5.1 Scorecard Window

Purpose

Show how participation is tracking against its targets.

Who uses it

SLT, PO and Marketing. Admin for troubleshooting.

What it does

1. Shows seven participation measures. Each has the current value, a bar, a target line (or a ceiling line for the expired measure) and a status of On track or Watch. The header counts how many are on track and how many are on watch.
2. The measures and their targets are:
3. Employees connected: at least 25%
4. Connections expired: at most 5%
5. Share success rate: at least 98%
6. Chat cards delivered: at least 100%
7. Priority campaigns reaching 25% of connected employees: at least 100%
8. Active employees in the last 30 days: at least 100
9. Reposts in the last 7 days: at least 150
10. The bar is the current value, and the line is the target.
